

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- 1.-3. (Canceled).
4. (Currently Amended) A device for treatment of degenerative retinal disease, comprising:
a moving member configured for chronic contact with at least a portion of an eye; and
an actuator for activating the moving member to stimulate the eye to effectuate treatment of the degenerative retinal disease,
wherein the moving member comprises a magnet and the actuator comprises a magnetic field source.
5. (Original) The device of claim 4, wherein the actuator is distally located relative to the moving member.
6. (Original) The device of claim 4, wherein the moving member is configured for contact with a retina of the eye.
7. (Original) The device of claim 6, wherein the moving member is configured for implantation in a subretinal space of the eye.
8. (Original) The device of claim 4, wherein the actuator comprises a projecting arm coupled to the moving member.
9. (Canceled).
10. (Currently Amended) The device of claim [[9]]4, wherein the magnetic field source comprises an extraocular magnetic field source.

11. (Currently Amended) The device of claim [[9]]4, wherein the magnetic field source comprises a time-varying magnetic field source.
12. (Currently Amended) ~~The device of claim 4~~A device for treatment of degenerative retinal disease, comprising:
a moving member configured for chronic contact with at least a portion of an eye; and
an actuator for activating the moving member to stimulate the eye to effectuate treatment of the degenerative retinal disease,
wherein the moving member comprises a body having a natural vibration frequency and the actuator comprises an oscillator operating substantially at the natural vibration frequency.
13. (Original) The device of claim 12, wherein the oscillator comprises an extraocular oscillator.
14. (Currently Amended) ~~The device of claim 4,~~A device for treatment of degenerative retinal disease, comprising:
a moving member configured for chronic contact with at least a portion of an eye;
an actuator for activating the moving member to stimulate the eye to effectuate treatment of the degenerative retinal disease; and
~~further comprising:~~ a body member supporting the moving member;
wherein the body member supports the actuator, and wherein the actuator comprises an electrical source.
- 15.-16. (Canceled).
17. (Currently Amended) The device of claim [[16]]14, wherein the moving member comprises an electrostatically-activated member.
18. (Currently Amended) The device of claim [[16]]14, wherein the moving member comprises a piezoelectric member.

19. (Currently Amended) The device of claim ~~[[16]]~~14, wherein the moving member comprises an electroactive polymer member.
20. (Currently Amended) The device of claim ~~[[16]]~~14, wherein the actuator comprises a heating element coupled to the electrical source.
21. (Original) The device of claim 20, wherein the moving member comprises a deflectable membrane sealing a cavity formed in the body member, the cavity comprising a fluid, and wherein the heating element is positioned to heat the fluid thereby causing expansion of the membrane.
22. (Original) The device of claim 20, wherein the moving member comprises a shape memory alloy in thermal communication with the heating element.
23. (Currently Amended) The device of claim ~~[[16]]~~14, wherein the electrical source comprises a photovoltaic element.
- 24.-26. (Canceled).
